

### Sample Summary

| Dataset        | N       | Black N (%)   | Non-Black N (%) | Unique Clans | Black Clans (%) |
|----------------|---------|---------------|-----------------|--------------|-----------------|
| Households     | 236,105 | 14,569 (6.2%) | 220,954 (93.8%) | 3,317        | -               |
| Clans          | 63,835  | 2,593 (4.1%)  | 61,242 (95.9%)  | 3,317        | 402 (12.1%)     |
| All Households | 306,369 | 22,831 (7.5%) | 282,766 (92.5%) | 7,588        | -               |
| All Clans      | 134,099 | 9,520 (7.1%)  | 124,579 (92.9%) | 7,588        | 1,304 (17.2%)   |

Notes:

- N = total number of household- or clan-years.
- Black households:  $\geq 1$  Black-identifying member.
- Black clans:  $\geq 50\%$  of members identify as Black.
- Unique households cannot be tracked over time in the PSID. See Materials and Methods for details.
- 'All' datasets include households within a clan with only one household.
