ER30001 "1968 INTERVIEW NUMBER"

1968 Interview Number (1968 ID Number)

This variable is the 1968 family ID number. The combination of this variable and Person Number (ER30002) provides unique identification for each individual on the data file. Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

ER31996 "SAMPLING ERROR STRATUM"

Sampling Error Stratum

This is the stratum code required for complex variance estimation that takes the stratified multistage sample design into account through the Taylor Series Linearization or Repeated Replication (Jackknife or Balanced Repeated Replication) methods. This variable and ER31997 are needed to correctly compute variance estimates for all types of PSID analyses. See the PSID technical document "Sampling Error Estimation in Design-based Analysis of the PSID" on the PSID website for details.

ER31997 "SAMPLING ERROR CLUSTER"

Sampling Error Cluster

This variable defines pairs of units within each stratum (ER31996), and is needed for computing sampling errors using the Taylor Series Linearization or Repeated Replication (Jackknife or Balanced Repeated Replication) methods. This variable should be used in conjunction with ER31996. See the PSID technical document "Sampling Error Estimation in Design-based Analysis of the PSID" on the PSID website for details.

ER32006 "WHETHER SAMPLE OR NONSAMPLE"

Whether Individual Is Sample

This variable not only indicates persons who were sample members but also flags nonsample members who were designated as followable. Thus far in PSID history, two such nonsample groups exist: nonsample elderly individuals, followed from 1990 through 1995, and nonsample parents of sample children if the children were under age 18, followed from 1994 through 2003.

Initially, the nonsample elderly have person numbers of 170 and higher and were aged 64 or older at the time of the 1989 interview and expected to be at least age 65 by the time of the 1990 interview. In each subsequent wave through 1995, a nonsample individual who was expected to be at least 65 years old by the time of the next interview was added to the group. Refer to Section I, Part 1, of the Guides to the 1990 and subsequent codebooks for further details.

Nonsample parents also have person numbers of 170 or greater. Initially, all such parents were designated in advance of the 1994 interview if any of their sample children were under age 18. These parents were followed until the youngest sample child reached age 25. As births of new sample members occurred from 1994 through 2003, their nonsample parent was made followable.

Beginning in 1994, children who were born since the initial interview for the sample to which they belonged and who carried the "PSID gene", that is, who had at least one sample parent but who did not move into a responding PSID family at birth, were designated moved-in sample members. Such children were assigned person numbers of 170 and higher but have individual weights for years when they are present in the PSID and otherwise fall under all PSID rules for sample members.

Some individuals whose cohort years are 1968,1997 or 1999 and whose family met similar eligibility criteria to the immigrant refresher sample added in 2017/2019 became sample themselves as of 2019. Those individuals have a value of 4 on this variable.

V439 "1968 WEIGHT"

Weight

All analysis on the entire sample using 1968 data only should be based on data weighted by this variable to reduce the biases from differential sampling and response rates.
However, it is possible to use the SRC cross- section sample only, without weights, since the response rates did not vary so much as to produce substantial biases.
Cross-section sample is identified by values of V3 (Family number) less than 3000

Head and Wife values are taken from question sequences detailing their education levels; see question references above and the 1968 questionnaire for details. If it was evident from the questionnaire that a Head or Wife was in school at time of the interview, then ER30009 was coded 1 and this variable has a value of 00, just as for other FU members.

A8. What is the highest grade (he/she) finished?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual has completed the eighth grade and was no longer in school. A code value of 16 indicates that this individual is at least a college graduate. This variable contains zeroes for current Heads and Wives/"Wives" because information about completed education was not asked annually for them as it was for other family unit members. Comparability is a problem here because not only is the Head and Wife/"Wife" information available only in bracketed form but also includes codes for receipt of nonacademic training and advanced degrees.

This variable contains zeroes for current Heads and Wives/"Wives" because information about completed education was not asked annually for them as it was for other family unit members. Comparability is a problem here because not only is the Head and Wife/"Wife" information available only in bracketed form but also includes codes for receipt of nonacademic training and advanced degrees.

ER30197 "HIGHEST GRADE FINISH 76"

COMPLETED EDUCATION FOR 1976:
A4. What was the highest grade (he/she) finished?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade and was no longer in school. A code value of 16 indicates that this individual is at least a college graduate. This variable contains values for 1976 Heads (from 1976 V4684) and Wives/"Wives" (from 1976 V4695 or 1976 V4755), although information about completed education is not asked annually for them as it is for other family unit members. Recency of Heads' data (i.e., whether questions were asked in 1975 or 1976) can be ascertained by the value of the variable for whether the family has a new Head (1976 V4658). Education information was obtained for all Heads in 1975. Education information was obtained for all Wives/"Wives" in 1975 and was collected again in 1976 (V4755) if the Wives'/"Wives'" questionnaire was asked. If the Wives'/"Wives'" questionnaire was not administered, then V4695 was used for Wife's/"Wife's" education and its recency is indicated by 1976 V4694. Values of 17 from 1976 V4684, V4895 or V4755 were recoded to 16 here to ensure comparability of Heads and Wives/"Wives" with other family unit members.

1977 Married Pairs Indicator

This variable links pairs of individuals who were married or permanently cohabiting at the time of the 1977 interview. The spouses in the first such pair within a family unit each receive a code value of 1 here; the second, a value of 2, and so on. Usually, the first married pair consists of Head and Wife/"Wife" or Head and Husband of Head.

ER30226 "HIGHEST GRADE FINISH 77"

COMPLETED EDUCATION FOR 1977:
A4. What was the highest grade (he/she) finished?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade and was no longer in school. A code value of 16 indicates that this individual is at least a college graduate. This variable contains values for 1977 Heads (from 1977 V5608) and Wives/"Wives" (from 1977 V5567), although information about completed education is not asked annually for them as it is for other family unit members. Recency of Heads' data can be ascertained by searching backward through the series of variables for whether the family has a new Head (1977 V5578 and 1976 V4658). Education information was obtained for all Heads in 1975. Recency of Wives'/"Wives'" data can be ascertained by searching backward through the series of variables for whether the family has a new Wife/"Wife" (1977 V5566 and 1976 V4694). Education information was obtained for all Wives/"Wives" in 1975 and was collected again in 1976 (V4755) if the Wives'/"Wives'" questionnaire was asked. Values of 17 from 1977 V5567 or V5608 were recoded to 16 here to ensure comparability of Heads and Wives/"Wives" with other family unit members.

ER30296 "K49 EDUCATION 79"

K49. What is the highest grade or year of school (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1979 interview. A code value of 16 indicates that this individual is at least a college graduate. This variable contains values for 1979 Heads (from 1979 V6754) and Wives/"Wives" (from 1979 V6713), although information about completed education is not asked annually for them as it is for other family unit members. Recency of Heads' data can be ascertained by searching backward through the series of variables for whether the family has a new Head (1979 V6724, 1978 V6127, 1977 V5578, and 1976 V4658). Education information was obtained for all Heads in 1975. Recency of Wives'/"Wives'" data can be ascertained by searching backward through the series of variables for whether the family has a new Wife/"Wife" (1979 V6712, 1978 V6115, 1977 V5566, and 1976 V4694). Education information was obtained for all Wives/"Wives" in 1975 and was collected again in 1976 (V4755) if the Wives'/"Wives'" questionnaire was asked. Values of 17 from 1979 V6713 or V6754 were recoded to 16 here to ensure comparability of Heads and Wives/"Wives" with other family unit members.

ER30478 "COMPLETED EDUCATION 85"

F90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1985 interview.

This variable contains values for 1985 Heads and Wives/"Wives" from 1985 family-level data. For 1985 Heads, these were computed as follows: if V11959 is greater than zero, then completed education equals 12 plus the value for V11959. For the remaining cases, a value of 1 at V11945 was converted to a value of 12. Otherwise, completed education equals V11948 plus V11953. Education was asked for all Heads in 1985. Wives/"Wives were treated similarly: if V12314 is greater than zero, then completed education equals 12 plus the value for V12314. For the remaining cases, a value of 1 at V12300 was converted to a value of 12. Otherwise, completed education equals V12303 plus V12308. Education was asked for all Wives/"Wives" in 1985.

ER30513 "COMPLETED EDUCATION 86"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1986 interview.

This variable contains values for 1986 Heads and Wives/"Wives" from 1986 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. For 1986 Heads, these were computed as follows: if V13582 is greater than zero, then completed education equals 12 plus the value for V13582. For the remaining cases, a value of 1 at V13568 was converted to a value of 12. Otherwise, completed education equals V13571 plus V13576. For the recency of the data, see family-level V13668. Wives/"Wives were treated similarly: if V13512 is greater than zero, then completed education equals 12 plus the value for V13512. The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1987 interview.

This variable contains values for 1987 Heads and Wives/"Wives" from 1987 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. For 1987 Heads, these were computed as follows: if V14629 is greater than zero, then completed education equals 12 plus the value for V14629. For the remaining cases, a value of 1 at V14615 was converted to a value of 12. Otherwise, completed education equals V14618 plus V14623. For the recency of the data, see family-level V14715. Wives/"Wives were treated similarly: if V14559 is greater than zero, then completed education equals 12 plus the value for V14559. For the remaining cases, a value of 1 at V14550 was converted to a value of 12. Otherwise, completed education equals V14552 plus V14555. For the recency of the data, see family-level V14716.

A code value of 17 indicates that this individual has completed at least some postgraduate work. This variable contains values for 1988 Heads and Wives/"Wives" from family-level data, although information about completed education is not asked annually for them as it is for other family unit members. For 1988 Heads, these were computed as follows: if V16103 is greater than zero, then completed education equals 12 plus the value for V16103. For the remaining cases, a value of 1 at V16089 was converted to a value of 12. Otherwise, completed education equals V16092 plus V16097. For the recency of the data, see family-level V16190. Wives/"Wives were treated similarly: if V16033 is greater than zero, then completed education equals 12 plus the value for V16033. For the remaining cases, a value of 1 at V16024 was converted to a

ER30620 "COMPLETED EDUC-IND 89"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1989 interview. A code value of 17 indicates that this individual has completed at least some postgraduate work. This variable contains values for 1989 Heads and Wives/"Wives" from 1989 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. For 1989 Heads, these were computed as follows: if V17500 is greater than zero, then completed education equals 12 plus the value for V17500. For the remaining cases, a value of 1 at V17486 was converted to a value of 12. Otherwise, completed education equals V17489 plus V17494. For the recency of the data, see family-level V17568. Wives/"Wives were treated similarly, using family-level variables. For 1989, see V17421-V17430. If V17430 is greater than zero, then completed education equals 12 plus the value for V17430. For the remaining cases, a value of 1 at V17421 was converted to a value of 12. Otherwise, completed education equals V17423 plus V17426. For the recency of the data, see family-level V17569.

This weight variable is to be used only for analysis of the core sample. If you wish to analyze both the core and Latino samples, then see V18945. If you wish to analyze only the Latino sample, then see V18944.

Note that a few core sample families have values of zero for this variable. These families were followed only for the elderly recontact effort, which included some nonsample individuals.

Weights for the core sample were completely revised in 1989 to account for deaths, marriages to nonsample persons, and differential nonresponse since 1968. See Section I, Part 5, Reweighting 1968-1990, pages 82-97 of the 1989 documentation volume and Section I, Part 5 of this volume for further information. This 1990 weight has been updated for marriages, divorces, etc. since 1989.

ER30657 "COMPLETED EDUC-IND 90"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1990 interview. A code value of 17 indicates that this individual has completed at least some postgraduate work. This variable contains values for 1990 Heads and Wives/"Wives" from 1990 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. For 1990 Heads, these were computed as follows: if V18831 is greater than zero, then completed education equals 12 plus the value for V18831. For the remaining cases, a value of 1 at V18817 was converted to a value of 12. Otherwise, completed education equals V18820 plus V18825. For the recency of the data, see family-level V18919. Wives/"Wives" were treated similarly, using family-level variables. For 1990, see 18752-V18761. If V18761 is greater than zero, then completed education equals 12 plus the value for V18761. For

A code value of 17 indicates that this individual has completed at least some postgraduate work. This variable contains values for 1991 Heads and Wives/"Wives" from 1991 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables V20198 (Head) and V20199 (Wife/"Wife") in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985. See family-level V20219 (Heads) and V20220 (Wives/"Wives") for the recency of this information.

This weight variable is to be used only for analysis of the core sample. If you wish to analyze both the core and Latino samples, then see V21549. If you wish to analyze only the Latino sample, then see V21548.

Note that a few core sample families have values of zero for this variable. These families were followed only for the elderly recontact effort, which included some nonsample individuals.

Weights for the core sample were completely revised in 1989 to account for deaths, marriages to nonsample persons, and differential nonresponse since 1968. See Section I, Part 5 of this volume and the 1989 documentation for further information. This 1992 weight has been updated for marriages, divorces, etc. since 1991.

This variable contains values for 1992 Heads and Wives/"Wives" from 1992 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables V21504 (Head) and V21505 (Wife/"Wife") in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985. See family-level V21525 (Heads) and V21526 (Wives/"Wives") for the recency of this information.

This family weight was recalculated for Release 4. It is to be used only for analysis of the core sample. If you wish to analyze both the core and Latino samples, then see V23363. If you wish to analyze only the Latino sample, then see V23362.

For details on the construction of this weight, go to the PSID website, psidonline.isr.umich.edu/: select 'Data & Documentation', then select 'Sample Weights', then PSID Longitudinal Weights, and 'PSID Revised Longitudinal Weights 1993-2005'.

V23363 "1993 LONGITUDINAL COMBINED FAMILY WEIGHT"

1993 Core-Latino Combined Family Longitudinal Weight

This weight variable is to be used only for combined analysis of the core and Latino samples. If you wish to analyze only the core sample, then see V23361. If you wish to analyze only the Latino sample, then see V23362.

Note that a few core sample families have values of zero for this variable. Families with zero value weights may include sample persons who were reinterviewed in the 1993 recontact effort or reappeared in the family after a number of years of nonresponse. Families are assigned a nonzero value for this weight variable only if they include one or more sample persons who were interviewed in 1988 or 1989. This latter criterion was necessary beginning in 1993 because the 1993 core includes a significant number of recontact families and individuals with extended sequences of missing years of PSID data. In addition, a few core families are comprised only of nonsample individuals. These were part of the elderly recontact effort.

See Section I, Part 5, of this volume and the 1989 documentation for further information. This 1993 weight has been updated for marriages, divorces, etc. since 1992. The 1993 Core Family weight also includes corrections for nonresponse that occurred since 1989 when the last complete nonresponse adjustment was performed.

ER30808 "RELATION TO HEAD 93"

1993 Relationship to Head

Note that these relationships are those to the 1992 Head for any individual whose 1993 sequence number (ER30807) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1992 Head is no longer present at the time of the 1993 interview, his or her relationship to Head is coded 10; the new 1993 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER30807=01).

ER30809 "AGE OF INDIVIDUAL 93"

Age at the Time of the 1993 Interview

The values for this variable represent the actual age of the individual reported in years on his or her most recent birthday. Consistency of ER30809 with ER30810-ER30811 was not forced unless it was clear that the interviewer made an error in recording the individual's age or birth date.

ER30812 "MARITAL PAIRS INDICATOR 93"

1993 Married Pairs Indicator

This variable links pairs of individuals who were married or permanently cohabiting at the time of the 1993 interview. Spouses in the first such pair within a family unit each receive a code value of 1 here; the second, a value of 2, and so on. Usually, the first married pair consists of Head and Wife/"Wife" or Head and Husband of Head.

ER30820 "YRS COMPLETED EDUCATION 93"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1993 interview.

This variable contains values for 1993 Heads and Wives/"Wives" from 1993 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables V23333 (Head) and V23334 (Wife/"Wife") in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985. See family-level V23339 (Heads) and V23340 (Wives/"Wives") for the recency of this information.

ER4160 "1994 FAMILY WEIGHT"

1994 Core Family Longitudinal Weight

This family weight was recalculated for Release 4. For details on the construction of this weight, go to the PSID website, psidonline.isr.umich.edu/: select 'Data & Documentation', then select 'Sample Weights', then PSID Longitudinal Weights, and 'PSID Revised Longitudinal Weights 1993-2005'.

Use this weight variable only for analysis of the core sample. If you wish to analyze only the Latino sample, then see ER4161. If you wish to analyze both the core and Latino samples, then see ER4162. Refer to Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for details on these weights.

ER4162 "1994 LONGITUDINAL COMBINED FAMILY WEIGHT"

1994 Longitudinal Core-Latino Combined Family Longitudinal Weight

This weight variable is to be used only for combined analysis of the core and Latino samples. If you wish to analyze only the core sample, then see ER4160. If you wish to analyze only the Latino sample, then see ER4161.

Note that a few core sample families have values of zero for this variable. Families with zero value weights may include sample persons who were reinterviewed in the 1993 recontact effort or reappeared in the family after a number of years of nonresponse. Families are assigned a nonzero value for this weight variable only if they include one or more sample persons who were interviewed in 1988 or 1989. This latter criterion was necessary beginning in 1993 because the 1993 core includes a significant number of recontact families and individuals with extended sequences of missing years of PSID data. In addition, a few core families are comprised only of nonsample individuals. These were part of the elderly recontact effort.

See Section I, Part 5, of the 1989 and 1990 documentation for further information.

ER33115 "YRS COMPLETED EDUC 94"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1994 interview. A code value of 17 indicates that this individual has completed at least some postgraduate work.

This variable contains values for 1994 Heads and Wives/"Wives" from 1994 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables for Head and Wife/"Wife" in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985.

Please note that this variable can contain negative values. Negative values indicate a net loss, which in waves prior to 1994 were bottom-coded at $1, as were zero amounts. These losses occur as a result of business or farm losses.

This variable is the sum of these five variables:

ER6986 Head and Wife/"Wife" Taxable Income-1994
ER6987 Head and Wife/"Wife" Transfer Income-1994
ER6990 Taxable Income of Other FU Members-1994
ER6991 Transfer Income of OFUMS-1994
ER6992 Family Total Social Security Income-1994

Values were not calculated for the Latino sample; see the codeframe below.

ER7000 "1995 LONGITUDINAL CORE FAMILY WEIGHT"

1995 Core Family Longitudinal Weight

This family weight was recalculated for Release 4. For details on the construction of this weight, go to the PSID website, psidonline.isr.umich.edu/: select 'Data & Documentation', then select 'Sample Weights', then PSID Longitudinal Weights, and 'PSID Revised Longitudinal Weights 1993-2005'.

Use this weight only for analysis of the core sample. If you wish to analyze only the Latino sample, then see ER7000A. If you wish to analyze both the core and Latino samples, then see ER7000B. Refer to Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for details on these weights.

Value/Range	Code Value/Range Text

.001 - 300.000	1995 Core Family weight

ER7000B "1995 LONGITUDINAL COMBINED FAMILY WEIGHT"

1995 Core-Latino Combined Family Longitudinal Weight

This weight variable is to be used only for combined analysis of the core and Latino samples. If you wish to analyze only the core sample, then see ER7000. If you wish to analyze only the Latino sample, then see ER7000A.

Note that a few core sample families have values of zero for this variable. Families with zero value weights may include sample persons who were reinterviewed in the 1993 recontact effort or reappeared in the family after a number of years of nonresponse. Families are assigned a nonzero value for this weight variable only if they include one or more sample persons who were interviewed in 1988 or 1989. This latter criterion was necessary beginning in 1993 because the 1993 core includes a significant number of recontact families and individuals with extended sequences of missing years of PSID data. In addition, a few core families are comprised only of nonsample individuals. These were part of the elderly recontact effort.

See Section I, Part 5 of the 1989 documentation for further information.

ER33203 "RELATION TO HEAD 95"

1995 Relationship to Head

Note that these relationships are those to the 1994 Head for any individual whose 1995 sequence number (ER33202) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1994 Head is no longer present at the time of the 1995 interview, his or her relationship to Head is coded 10; the new 1995 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER33202=01).

ER33204 "AGE OF INDIVIDUAL 95"

Age at the Time of the 1995 Interview

The values for this variable represent the actual age of the individual reported in years on his or her most recent birthday. Consistency of ER33204 with ER33205-ER33206 was not forced unless it was clear that the interviewer made an error in recording the individual's age or birth date.

ER33207 "MARITAL PAIRS INDICATOR 95"

1995 Married Pairs Indicator

This variable links pairs of individuals who were married or permanently cohabiting at the time of the 1995 interview. Spouses in the first such pair within a family unit each receive a code value of 1 here; the second, a value of 2, and so on. Usually, the first married pair consists of Head and Wife/"Wife" or Head and Husband of Head.

ER33215 "YEARS COMPLETED EDUCATION 95"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1995 interview.

This variable contains values for 1995 Heads and Wives/"Wives" from 1995 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables for Head and Wife/"Wife" in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985.

1996 Relationship to Head

Note that these relationships are those to the 1995 Head for any individual whose 1996 sequence number (ER33302) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1995 Head is no longer present at the time of the 1996 interview, his or her relationship to Head is coded 10; the new 1996 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER33302=01).

Usually, the first married pair consists of Head and Wife/"Wife" or Head and Husband of Head.

ER33315 "YEARS COMPLETED EDUCATION 96"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1996 interview.

This variable contains values for 1996 Heads and Wives/"Wives" from 1996 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables for Head and Wife/"Wife" in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985.

ER33404 "AGE OF INDIVIDUAL 97"

Age at the Time of the 1997 Interview

The values for this variable represent the actual age of the individual reported in years on his or her most recent birthday. Consistency of ER33404 with ER33405-ER33406 was not forced unless it was clear that the interviewer made an error in recording the individual's age or birth date.

ER33407 "MARITAL PAIRS INDICATOR 97"

1997 Married Pairs Indicator

This variable links pairs of individuals who were married or permanently cohabiting at the time of the 1997 interview. Spouses in the first such pair within a family unit each receive a code value of 1 here; the second, a value of 2, and so on. Usually, the first married pair consists of Head and Wife/"Wife" or Head and Husband of Head.

ER33415 "YEARS COMPLETED EDUCATION 97"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1997 interview.

This variable contains values for 1997 Heads and Wives/"Wives" from 1997 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables for Head and Wife/"Wife" in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985.

Release Number

May 2008: Variables ER16467 to ER16517, formerly available separately, have now been incorporated into this file, with new variable names. Variable ER16518 has been recalculated. Variable ER16519, a family cross-sectional weight, has been added.

November 2013: Added generated variables such as Family Composition Change (ER13008A), Births to HD/WF/OFUM (ER16517A-ER16517H), Region where HD grew up (ER16431A), HD Geographic Mobility (ER16431B), Interview length (ER13005B), mode of interview (ER13005C), and calls for interview (ER13005D). Also we have brought forward the background section for old Heads and Wives in section KL. Corrected data for Beale Rural-Urban Code (ER16431) although this variable will now be suppressed on the public release file.

February 2014: For Release 6 we have added one new variable Collapsed Beale (ER16431C). Additionally we have completed contingency corrections for a handful of cases for the family level T-2 variables ER16221-ER16223 ER16230-ER16245 after further cleaning of corresponding individual level T-2 variables.

January 2016: For Release 7 we have added one new variable Splitoff Indicator (ER13005E). Additionally we have corrected the top code values for A20 and A21 (ER13041 and ER13042) to match the codebook description. We have corrected the bottom code for H14/H38 (ER15544/ER15652) and H17/H41 (ER15547/ER15655) for both Head and Wife/"Wife" where 1 means one cigarette or fewer per day.

November 2017: For Release 8, we have added 25 generated food security variables (ER14331A-ER14331Y). The food security variables were put through the same imputation and calculation process as was completed on the 2015 data to produce food security scale score and category. We have also added the aggregated consumption variables (ER16515A1-ER16515D6). These variables were previously released on a supplemental file.

June 2023: For Release 9, we have added 26 variables to the consumption series. 25 variables are accuracy codes and one is a generated variable TOTAL EXPENDITURE 1999 (ER16515D7). Users should also note that the range for HOME INSURANCE EXPENDITURE (ER16515A9) was revised.

ER33501 "1999 INTERVIEW NUMBER"

1999 Interview Number (1999 ID Number)

The values for this variable represent the 1999 interview number of the family in which this individual was included in 1999. We interviewed a total of 6,997 families in 1999, 70 of whom were Immigrant "recontacts"--that is, who were eligible but nonresponse for the 1997 Immigrant sample or who were ineligible in 1997 but became eligible by 1999. This group of 70 families is referred to as the Immigrant recontact sample.

Value/Range	Code Value/Range Text

10,001 - 10,071	1999 family interview number for 1999 Immigrant recontact sample families
0	This individual was main family nonresponse by 1999 or mover-out nonresponse by 1997; from Latino sample (ER30001=7001-9308); from Immigrant 2017 sample (ER30001=4001-4851)

ER33502 "SEQUENCE NUMBER 99"

ER33503 "RELATION TO HEAD 99"

1999 Relationship to Head

Note that these relationships are those to the 1997 Head for any individual whose 1999 sequence number (ER33502) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1997 Head is no longer present at the time of the 1999 interview, his or her relationship to Head is coded 10; the new 1999 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER33502=01).

ER33504 "AGE OF INDIVIDUAL 99"

Age at the Time of the 1999 Interview

The values for this variable represent the actual age of the individual reported in years on his or her most recent birthday. Consistency of ER33504 with ER33505-ER33506 was not forced unless it was clear that the interviewer made an error in recording the individual's age or birth date.

ER33507 "MARITAL PAIRS INDICATOR 99"

This variable links pairs of individuals who were married or permanently cohabiting at the time of the 1999 interview. Spouses in the first such pair within a family unit each receive a code value of 1 here; the second, a value of 2, and so on. Usually, the first married pair consists of Head and Wife/"Wife" or Head and Husband of Head.

ER33516 "YEARS COMPLETED EDUCATION 99"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 1999 interview.

This variable contains values for 1999 Heads and Wives/"Wives" from 1999 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables for Head and Wife/"Wife" in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985.

ER33546 "CORE/IMM INDIVIDUAL LONGITUDINAL WT 99"

1999 Combined Core-Immigrant Sample Individual Longitudinal Weight

This individual weight was recalculated for Release 3. For details on the construction of this weight, go to the PSID website, psidonline.isr.umich.edu/: select 'Data & Documentation', then select 'Sample Weights', then 'PSID Longitudinal Weights', and 'PSID Revised Longitudinal Weights 1993-2005'.

This weight variable enfolds the Immigrant recontact sample begun in this wave and also includes the 1997 Immigrant sample. Values are nonzero for sample members associated with either a 1999 core or 1999 Immigrant response family. No weight variable exists for analysis of the core or the Immigrant samples separately.

The range of possible values for this variable is .287-167.679.

ER17001 "RELEASE NUMBER"

Release Number

May 2008: Variables ER20395-ER20458, formerly available separately, have now been incorporated into this file with those variable names. Variable ER20394 has been recalculated. Variable ER20459, a family cross-sectional weight, has been added.

November 2013: Added generated variables Births to HD/WF/OFUM (ER20458A-ER20458H), Region HD Grew Up (ER20377A), Head Geographic Mobility (ER20377B), K-6 Distress Scale (ER19833A). Also added Calls for Iw (ER17005B), and Iw Length (ER17005C). For this release we have also updated some of the KL background variables that were not ready at the time of the original 2001 release. On release 3, we are suppressing some additional variables to protect the anonymity of our respondents.

February 2014: For Release 4 we have added one new coded variable in the philanthropy section (ER20081A) and Collapsed Beale (ER20377C). Additionally, we have corrected extant T-2 variables for a handful of cases.

January 2016: For Release 5 we have corrected the bottom code for H14/H38 (ER19709/ER19817) and H17/H41 (ER19712/ER19820) for both Head and Wife/"Wife" where 1 means one cigarette or fewer per day.

November 2017: For Release 6 we have added 25 generated food security variables (ER18470A-ER18470Y). The food security variables were put through the same imputation and calculation process as was completed on the 2015 data to produce food security scale score and category. We have also added the aggregated consumption variables (ER20456A1-ER20456D6) to the family release file. These variables were previously released on a supplemental file.

June 2023: For Release 7, we have added 26 variables to the consumption series. 25 variables are accuracy codes and one is a generated variable TOTAL EXPENDITURE 2001 (ER20456D7). Users should also note that the range for HOME INSURANCE EXPENDITURE (ER20456A9) was revised.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2001 interview.

This variable contains values for 2001 Heads and Wives/"Wives" from 2001 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables for Head and Wife/"Wife" in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985.

ER24099 "TOTAL FAMILY INCOME LAST YEAR"

ER33716 "YEARS COMPLETED EDUCATION 03"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2003 interview.

This variable contains values for 2003 Heads and Wives/"Wives" from 2003 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables ER24148 (Head) and ER24149 (Wife/"Wife") in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985. See family-level ER24153 (Heads) and ER24154 (Wives/"Wives") for the recency of this information.

2003 Combined Core-Immigrant Sample Individual Longitudinal Weight

This individual weight was recalculated for Release 3. This weight variable enfolds the 1997 and 1999 Immigrant samples. Values are nonzero for sample members associated with either a 2003 core or 2003 Immigrant response family. No weight variable exists for analysis of the core or the Immigrant samples separately.

The range of possible values for this variable is .248-173.563.

ER25001 "RELEASE NUMBER"

Release Number

November 2013: Correcting the following four variables: Births to OFUMS in 2003 (ER28077), Number of businesses owned by FU in 2004 (ER27907), Number of businesses owned by Head (ER27912), and Number of businesses owned by Wife (ER27942). Due to further hand look-ups after Release 2 was made, there are 198 cases that have different values for Head and Wife Taxable Income - 2004 (ER27953) and Total Family Money Income - 2004 (ER28037). In addition, we are suppressing previously released variables Beale Rural-Urban Code (ER28043), and Size of Largest City the county (ER28044).

February 2014: For Release 4 we have added four new coded variables in the philanthropy section M12code, M41code, M43code and M52code (ER27510A, ER27634A, ER27644A, ER27667A) and Collapsed Beale (ER28043A). In addition we have dropped fifteen previously released variables from the T-2 (Section R) range (ER27712-ER27726). These were originally released as family level variables for Head and Wife/"Wife" but since they also contain data for OFUMs, we have moved them to the Cross Year Individual File instead.

January 2016: For Release 5 we have added 96 new variables in the T-2 (2003) Income section, 86 of which are about time unemployed for Head (ER27711A1-ER27711B5) and Wife/"Wife" (ER27711F4-ER27711G8), time out of the labor force for Head (ER27711B6-ER27711D1) and Wife/"Wife" (ER27711G9-ER27711J4), and time employed for Head (ER27711D2-ER27711E7) and Wife/"Wife" (ER27711J5-ER27711L1). The other 10 new variables are T-2 hours worked, labor income, and accuracy checks for Head (ER27711E8-ER27711F3) and for Wife/"Wife" (ER27711L2- ER27711L6).

November 2017: For Release 6 we have added the aggregated consumption variables (ER28037A1-ER28037E3). These variables were previously released on a supplemental file. A correction was made to the imputation of missing data for vehicle gasoline costs, additional vehicle costs, and vehicle repair costs.

June 2023: For Release 8, we have added 34 variables. 31 variables are accuracy codes and one is a generated variable TOTAL EXPENDITURE (ER41027E4) for consumption. 2 variables were added to chronic conditions. Users should also note that the range for HOME INSURANCE EXPENDITURE 2007 (ER41027A9) was revised.

Thus, for example, if the 2003 Head is no longer present at the time of the 2005 interview, his or her relationship to Head is coded 10; the new 2005 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER33802) are coded 01.

ER33817 "YEARS COMPLETED EDUCATION 05"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2005 interview.

This variable contains values for 2005 Heads and Wives/"Wives" from 2005 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables ER28047 (Head) and ER28048 (Wife/"Wife") in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985. See family-level ER28052 (Heads) and ER28053 (Wives/"Wives") for the recency of this information.

This weight variable enfolds the 1997 and 1999 Immigrant samples. Values are nonzero for sample members associated with either a 2005 core or 2005 Immigrant response family. No weight variable exists for analysis of the core or the Immigrant samples separately.

For details on the construction of this weight, go to the PSID website, psidonline.isr.umich.edu/: select 'Data & Documentation', then select 'Sample Weights', then 'PSID Longitudinal Weights', and 'PSID Revised Longitudinal Weights 1993-2005'.

ER33917 "YEARS COMPLETED EDUCATION 07"

G90. What is the highest grade or year of school that (he/she) has completed?

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2007 interview.

This variable contains values for 2007 Heads and Wives/"Wives" from 2007 family-level data, although information about completed education is not asked annually for them as it is for other family unit members. This variable differs from the family-level variables ER41037 (Head) and ER41038 (Wife/"Wife") in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Education was re-asked of all Heads and Wives/"Wives" in 1985. See family-level ER41042 (Heads) and ER41043 (Wives/"Wives") for the recency of this information.

ER42001 "RELEASE NUMBER"

Release Number

November 2013: An error was corrected for how Completed Education for Head (ER46981) and for Wife/"Wife" (ER46982) were calculated for old Heads and Wives/"Wives'". Since all education questions were re-asked in 2009, completed education summary variables should have been re-calculated based on this new information for old Heads and Wives/"Wives" collected in 2009. The correction included bringing the corrected 2009 data forward to 2011.

We are also correcting the summary variable Births to OFUMS only - 2007 (ER47011).

In addition, in Release 2 we are suppressing two previously publicly released variables Beale Rural-Urban Code (ER46975) and Size of Largest City in County (ER46976).

February 2014: In Release 3 we have added one new coded variable in the philanthropy section M12code (ER46659A) and Collapsed Beale (ER46975A).

January 2016: For Release 4 we have added 74 new variables in the T-2 (2007) Income section: Number of Jobs for Head (ER46670A) and Wife/"Wife" (ER46681A), months employed for Head (ER46670B-ER46670M) and Wife/"Wife" (ER46681B-ER46681M), months unemployed for Head (ER46666A-ER46666L) and Wife/"Wife" (ER46677A-ER46677L), and months out of the labor force for Head (ER46668A-ER46668L) and Wife/"Wife" (ER46679A-ER46679L).

November 2017: For Release 5 we have added the aggregated consumption variables (ER46971A1-ER46971E3). These variables were previously released on a supplemental file. A correction was made to the imputation of missing data for vehicle gasoline costs, additional vehicle costs, and vehicle repair costs.

June 2023: For Release 6, we have added 34 variables. 31 variables are accuracy codes and one is a generated variable TOTAL EXPENDITURE (ER46971E4) for consumption. 2 variables were added to chronic conditions. Users should also note that the range for HOME INSURANCE EXPENDITURE 2009 (ER46971A9) was revised.

ER34230 "YEARS COMPLETED EDUCATION 13"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Heads/Wives/"Wives" and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2013 interview.

The values for 2013 Heads/Wives/"Wives" are pulled from 2013 family-level data. Beginning in 2013, we asked for an education update from our returning Heads/Wives/"Wives". If they report additional education attainment, then we have updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER57557, for Wives/"Wives", and ER57667, for Heads).

The values for 2013 OFUMs are derived from G90a1 (ER34219).

This variable differs from the family-level variables ER58223 (Head) and ER58224 (Wife/"Wife") in the treatment of Heads and Wives/"Wives" who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G90a1 (ER34219) in the treatment of OFUMs who received a GED (G90a2=2) but the value derived from G90a1 is less than 12 years; that is, G90a1 retains the grade completed but the value for this variable is coded as 12.

ER34349 "YEARS COMPLETED EDUCATION 15"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Heads/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2015 interview.

The values for 2015 Heads/Spouses/Partners are pulled from 2015 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Heads/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER64680, for Spouses/Partners, and ER64819, for Heads).

The values for 2015 OFUMs are derived as follows: for new Heads/Spouses/Partners/eligible OFUMS: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Heads/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER65459 (Head) and ER65460 (Spouse/Partner) in the treatment of Heads and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER34323) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

ER71570 "2017 CORE/IMMIGRANT FAM WEIGHT NUMBER 1"

2017 Core/Immigrant Family Longitudinal Weight

This weight variable is used for analysis of Core 1968 and 1997/1999 Immigrant families, it excludes the Immigrant families added in 2017.

The weight is constructed by summing the individual-level weight values (ER34651) for all persons associated with a given PSID response family in 2017 and calculating the average.

Users should note that the new Immigrant 2017 sample (ER66009=4001-4462) has values of zeros for this variable as no historical data is available for these cases and, therefore, they currently should not be included in any longitudinal analysis.

ER34503 "RELATION TO REFERENCE PERSON 17"

2017 Relationship to Reference Person

Note that these relationships are those to the 2015 Reference Person for any individual whose 2017 sequence number (ER34502) is greater than 50; that is, individual has moved out of the FU. Thus, for example, if the 2015 Reference Person is no longer present at the time of the 2017 interview, his or her relationship to Reference Person is coded 10; the new 2017 Reference Person also is coded 10. Therefore, to select current Reference Persons, the user must select those coded 10 in this variable whose sequence numbers (ER34502) are coded 01.

ER34548 "YEARS COMPLETED EDUCATION 17"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Reference Persons/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2017 interview.

The values for 2017 Reference Persons/Spouses/Partners are pulled from 2017 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Reference Persons/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER70753, for Spouses/Partners, and ER70891, for Reference Persons).

The values for 2017 OFUMs are derived as follows: for new Reference Persons/Spouses/Partners/eligible OFUMS: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER71538 (Reference Person) and ER71539 (Spouse/Partner) in the treatment of Reference Persons and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER34522) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

ER34650 "CORE/IMM INDIVIDUAL LONGITUDINAL WT 17"

2017 Combined Core-Immigrant Sample Individual Longitudinal Weight

This weight variable enfolds the 1997 and 1999 Immigrant samples. Values are nonzero for sample members associated with either a Core or Immigrant 97-99 family that is response in 2017. No weight variable exists for analysis of the Core or the 97/99 Immigrant samples separately.

The range of possible values for this variable is .0.202-167.068.

Users should note that the Immigrant 2017 sample (ER30001=4001-4851) has values of zeros for this variable as no historical data is available for these cases and, therefore, they currently should not be included in any longitudinal analysis.

ER34752 "YEARS COMPLETED EDUCATION 19"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Reference Persons/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2019 interview.

The values for 2019 Reference Persons/Spouses/Partners are pulled from 2019 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Reference Persons/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER76761, for Spouses/Partners, and ER76906, for Reference Persons).

The values for 2019 OFUMs are derived as follows: for new Reference Persons/Spouses/Partners/eligible OFUMS: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER77599 (Reference Person) and ER77600 (Spouse/Partner) in the treatment of Reference Persons and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER34722) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

Important Note regarding values of Don't Know and NA/Refused:
Please note that for cases where the mode is computer-assisted telephone interview, the values of "Don't Know" and "NA/Refused" are indistinguishable and both mean that the respondent was asked the question but did not provide an answer. Users could choose to collapse these two values without loss of information.
These values are not used when the interview is completed through self-administration on the web.

For Release 2, we have updated values for lead in questions about whether donated to types of causes that were missing information for the web mode. These include M3 (ER81347), M4 (ER81354), M5 (ER81361), M11 (ER81368), M6 (ER81376), M7 (ER81383), M8 (ER81390) and M10 (ER81397).

For Release 3: we have updated values for a small number of cases in the pension section where a programming error inadvertently updated values to zero for some variables that shouldn't have been changed. Affected variables are in the range P46-P67. A second set of corrections involved a larger number of cases in which we recalculated the water A43 annualization for those who reported a per of quarterly. This recalculation affected the following variables ER81847 HOUSING EXPENDITURE, ER81858 UTILITY EXPENDITURE, ER81862 WATER/SEWER EXPENDITURE, ER81914 TOTAL EXPENDITURE, and ER81915 TOTAL CONSUMPTION WITH RENTAL VALUE. ER34952 "YEARS COMPLETED EDUCATION 21"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Reference Persons/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2021 interview.

The values for 2021 Reference Persons/Spouses/Partners are pulled from 2021 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Reference Persons/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER81026, for Spouses/Partners, and ER81153, for Reference Persons).

The values for 2021 OFUMs are derived as follows: for new Reference Persons/Spouses/Partners/eligible OFUMS: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER81935 (Reference Person) and ER81936(Spouse/Partner) in the treatment of Reference Persons and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER34922) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

Non-comparability Notes Appendix

F-e A missing data code was allowed for this variable, but values for some comparable variables in other years were assigned.

F-g Field widths differ. Truncation of some variables in this list may be necessary. See codebooks.

F-jj Background section variable, asked only of new Heads/Wives/"Wives". Data values for cases with same Heads/Wives/"Wives" as in the previous wave have been carried forward from the time when these persons most recently became new Heads/Wives/"Wives" or when the questions were reasked of all Heads/Wives/"Wives". Some of these variables may require updating. See the User Guide or the specific variable descriptions in the codebook. Note that for 1994-1996, 1999 and 2001, data have not been brought forward for same Heads and Wives/"Wives". In 1997, the background sections were rewritten to include a number of new questions; these and many familiar items were reasked of everyone. Education, sibling information, and years worked were, however, NOT reasked. Information was not brought forward from prior waves for these variables. However, from 2003 forward, the data are complete for everyone.

F-ll These variables have been generated since 1977 for comparability with 1968-1976 data. See the User Guide for further details.

F-m This is a bracket variable. If field amounts were coded in other years, they may be bracketed for comparability.

F-n Coding structure and/or categories differ; see codebooks for details.

F-pp These variables are coded directly from Wives'/"Wives'" questionnaires, asked in 1976 and 1985, and reported by Wives/"Wives" themselves.

F-q This variable is one of two mentions coded from the responses or is a double-mention variable (a two-digit variable with the first digit equalling the data value for the first mention and the second equalling the data value for the second mention). Both first and second mention variables may or may not be priority coded. See codebooks for details.

F-s For these years, code 9, not ascertained, includes cases where data are missing on whether lump sums were received or not. In all successive waves, however, such cases are included in the code category 0, "inappropriate".

F-v In 1968, 9s were coded instead of 0s when Head did no work for money and therefore had no hourly earnings.

F-y Note that the weight variables are not comparable across waves. Three types of weights (core only, Latino only and combined core-Latino) were created beginning in 1990 because of the addition of the Latino sample. Be sure to select the proper weight for the sample being analyzed. For a discussion of weights, see Section I, Part 5 of the most current) Documentation or the User Guide. Weights for all years were retroactively recalculated in 1989.

I-f The 1983 and later years' codings of relationship to head are much more detailed than in previous years. We hope some day to recode relationship to head for 1968-1982 in the same detail.

I-i Values for Heads and Wives are taken from background information, which is not reasked annually. Therefore, these data may not be current. For other family members, the variables from 1979 on indicate the grades of school completed for individuals either still in school or who have finished their education. The 1968-1978 variables, excepting V30189 and V30115, indicate completed levels only for those who have finished their education. See the codebook for details about Heads, Wives, and Other Family Unit Members.

I-j Categories differ; see codebook for details.

I-k Field width differs.

I-l Note that the weight variables are not comparable across waves. Three types of weights (core only, Latino only and combined core-Latino) were created for 1990 through 1995 because of the addition of the Latino sample. Beginning in 1993, weighting philosophy for recontacts changed. See Section I, Part 5 of the 1993, the 1990 and the 1992 documentation or the User Guide for further information and details. Weights were retroactively recalculated for all years in 1989.
